### Background:

Environmental education results in longer attention spans, more creativity, higher levels of self-confidence, greater academic success, improvements in cognitive development, self-discipline, imaginative and creative expression, language skills and social interactions. Here, on the remarkably beautiful Sunshine Coast, our students experience the wonders of nature as a normal part of their learning.

### Discussion:

- The District's Environmental Action Committee has developed an Environmental Action plan (attached) that presents a comprehensive strategy for meeting goals 1(i) and 3(d).

### Next steps include:

- We are proud of our staff for having achieved remarkable growth in environmental education and facilities upgrades. Our new Environmental Action Plan includes goals that will build upon the district's rich tradition of environmental awareness and action.
